

Quality Context: Analytical Chemist

The Company

Quality Context develops and implements integrated Quality Management Systems and Quality Solutions to improve regulatory compliance within the pharmaceutical industry and healthcare industry. The Analytical Services division provides a wide range of contract analytical services including QC release analysis, method development, method validation, stability analysis and compliance support.

Due to our continued growth we are now recruiting for an Analytical Chemist to join our team. This is an excellent opportunity to work in a busy and fast paced laboratory working for clients across the world.

Scope and Remit

Quality Context is looking for a motivated and enthusiastic analytical professional to work alongside a busy and fast growing team of scientists in our laboratory in Sheffield. The ideal candidate will be proactive and able to work well as part of a team and alone to carry out specific testing activities on client projects. You will need to be comfortable working under pressure and managing multiple priorities.

The aim of the Analytical Scientist's role is to provide analytical support in the delivery of client projects, assist with method development and method validation activities along with the management of other analytical projects. The right candidate will be keen to contribute to the successful operation of the laboratory. You should also have good written and verbal communication skills.

The Analytical Chemist would be based at our laboratory facility at the Sheffield Bioincubator (temporarily until September) and then at our Head Office at Leigh Street, Sheffield, near to Sheffield Arena and Attercliffe Road.

Role Duties

- Perform physical and analytical testing of client samples as required on a project by project basis.
- Follow internal and client specific methodologies.
- Adherence to GMP requirements.
- Review and verify peers' analytical data.

- Ensure that laboratory housekeeping standards are maintained at all times and documented accurately.
- Comply with all aspects of the QMS at all times.

Knowledge, Training and Experience

- A degree level qualification and/or 1-2 years of experience in a similar role.
- Experience of working in a GMP environment.
- Knowledge of and experience of working within a QC environment would be preferable.
- Customer service, sales or any other relevant experience an advantage.
- Methodical with the ability to follow procedures accurately.
- Organisational skills with the ability to prioritise.
- Ability to work under pressure, meet deadlines whilst showing attention to detail.
- Flexibility, enthusiastic and confident approach; a willing member of the team.

Quality Context Offer

Quality Context are growing family run businesses, based in Sheffield and can offer the following:

- Competitive salary – Negotiable depending on experience.
- 21 days holiday + bank holidays.
- Company contributory pension.

To apply, please send your CV and a covering letter to recruitment@qualitycontext.com.

Please title your email 'Analytical Chemist and YOUR NAME'.

The closing date for this role is 31 August 2016.
